

THREE

HOLISTIC CARE BOOK

Opening a new door to holistic care.

Feel the balance between your mind, body, and skin and bring out your intrinsic beauty.

THREE pursues this basic concept of holistic care, aiming to visualize the instinctive vitality and beauty brought out by what lies beyond the concept - society, nature, and the harmony within oneself - in each and every person.

The key to opening that door is nature's gift — plants.

We can feel nature's heartbeat in every drop of essential oil; it stays with us and gently adapts to our sensitivities.

Even modern science can't recreate the altruism of fresh plant extracts.

When precious ingredients harvested and extracted with perfect timing and care are blended together with expert knowledge, skills, and sensibilities, the gifts of nature demonstrate capabilities beyond our imaginations.

Think carefully about the natural environment which surrounds you and you'll understand yourself as part of your natural surroundings, adapting to change every day.

Feel Earth's rhythm together with your own to achieve a life which shimmers and resonates and a beauty which goes beyond self-care.

These are the elements of holistic care which THREE aims to achieve.

THREE Holistic Care *Development Standards

THREE Holistic Care uses the gifts of nature to provide safe and reliable products without compromising on comfort and effectiveness. Therefore, we established the following development standards..

Gaining the International COSMOS Organic Cosmetic Product Certification

We aim to gain the COSMOS certification for our holistic care product lineup by 2025.

The COSMOS standard unifies five different organic cosmetics certification standards in Europe. Our current high-level standards use strict assessment criteria which prohibit the use of genetically modified ingredients and also cover ingredient logistics routes, product life cycles, and even packaging materials.

A Commitment to Using Domestic Ingredients

While we strive to maintain a global perspective to comply with the Convention on Biological Diversity, we predominantly focus on the gifts of nature produced in Japan so that we aren't reliant on rare ingredients found overseas. Furthermore, we are committed to development which prioritizes respect for and cooperative relationships with the natural environment and producers, local economic vitality and preserving traditions.

Adopting Advanced Knowledge

Based on the notion that people are the most familiar parts of nature, we design and develop our products from a holistic perspective, integrating the gifts of nature with advanced knowledge of chronobiology and skin physiology.

Even if the following ingredients produce effective cosmetic products, we will not use them for safety reasons.

We won't use components containing Asteraceae, Pinaceae, Cupressaceae, and other gymnosperms; peanuts, or wheat.

No Animal Testing.

Because we want to protect and maintain the natural environment and ecosystems, we don't conduct animal testing.

*THREE Holistic Care is the generic term for skin care, body care, scalp & hair care, care for biological rhythms, and environmental care.

A straight path to your natural beauty instinct.

With a holistic approach to healthy beauty, THREE has been focusing on essential oils extracted in concentrated form from — nature's gifts — plants since our journey began. THREE's unique formulas are a sophisticated blend of fragrantly aromatic, high-quality essential oils formulated specially for the aim of each product. The products contain original blends of essential oils.

BALANCING

balancing cleansing oil

The perfect balance of moisture, created with rhythm.

Eating a balanced diet and going to sleep by 10 p.m.

Many of us cannot achieve such an ideal lifestyle rhythm.

THREE s Balancing lineup features core skincare products created based on the rhythm that the mind, body, and the skin originally possess.

Our skin is affected by the irregular lifestyles and harsh environment that the contemporary society has created.

The Balancing lineup balances the moisture in the skin - the origin of beauty - with synergistic effects of the gifts of nature combined with the power of the skin to become healthy, the power which humans naturally hold.

The moment of your skin care routine filled with the comfort of a refreshing yet rich aroma and a texture which appeals to the five senses.

For all women who live in this fast-moving world.

Let us lead a regular lifestyle and achieve the optimal balance of the mind, body, and the skin.

THREE SKINCARE TIPS

Effective use of THREE skincare products

Shake liquid products gently before use.

Essential oils are lipophilic and do not mix well with water. Shaking the bottle before use evenly disperses the essential oils and keeps the product uniform until it is used up.

How to spread properly.

When spreading onto the skin directly with the hands, warm the product in the palms before applying. Warming the product lets it penetrate the skin better. Patting the skin causes the essential oils to vaporize. Instead, press the skin firmly to let the product penetrate.

Close container lids tightly.

Essential oils are volatile ingredients. It is important to tightly close the lid after use to prevent loss of their efficacy. The soaps should also be stored in a case with a cover.

Choose storage locations carefully.

The essential oils and other naturally derived ingredients are prone to deterioration with heat and humidity. Do not store the products near windows or in other places that are exposed to direct sunlight or in hot and humid places.
